

Science Technology Engineering Math

Apply **STEM** concepts in real world scenarios with **Junior Achievement**

JA BizTown has updated its focuses to integrate more **STEM** concepts to better help students recognize how they will apply these lessons through real life scenarios.

JA BizTown provides students in grades 4-6 with a solid foundation of business, economics and free enterprise education. Through daily hands-on activities, and active participation in a simulated community designed to support differentiated learning styles, students develop a strong understanding of the relationship between what they learn in school and their local economy.
